### **Course description**

- This course distills research about survey questions to principles that can be applied to write survey questions that are clear with the goal of obtaining valid and reliable answers. Lectures provide guidelines for writing and revising survey questions and illustrate how to revise problematic features of questions. Sessions provide a detailed examination of guidelines for writing questions about events and behaviors and questions about subjective phenomena, such as attitudes and evaluations.
- The workshop style of the course provides students with tools to use in diagnosing problems in survey questions and in writing their own survey questions. Sessions combine lecture with group exercises and discussion. Exercises require that students analyze problematic questions and revise them.

### **Course objectives**

- Introduce a structural analysis of parts of a survey question.
- Describe guidelines for diagnosing problems in survey questions and writing new survey questions.
- Focus on the structure and wording of survey questions, whether for interviewer-administered or self-administered instruments.
- Provide an opportunity to apply the guidelines and principles during in-class exercises.
- Focus on improving individual questions and sets of questions.
- Summarize research that underlies key decisions in writing survey questions.
- Introduce cognitive interviewing as a method for testing survey questions.

### **Who should attend**

- Individuals who will be writing or reviewing survey questions or survey instruments or analyzing survey data.
- This course gives practical guidance to those who have written survey questions but who are not familiar with the research on question design, those who are just beginning to design survey instruments, and those who use survey data but do not themselves design survey instruments.

### **Course URLs**

- Lecture will be held in over Zoom. Zoom log on information:
  - URL: @
- Course materials will be available on Canvas
  - URL: @
  - In order to accommodate busy schedules, Lecture notes will be posted to Canvas and students will

be able to access them up to one month after the end of the course.

## Assignments

- Assignments for this course include daily readings and some short exercises.

### 1. Readings

- Readings are listed in the Course Outline and available on Canvas.
- Lectures assume that you have completed the assigned readings before the lecture.
- Completing the readings before class will greatly enhance what you learn from the course.
- Reading these two articles before the first day of class will help you get the most from this course:
  - Schaeffer, Nora Cate and Stanley Presser. 2003. "The Science of Asking Questions." *Annual Review of Sociology* 29:65-88.
  - Schaeffer, Nora Cate and Jennifer Dykema. 2020. "Advances in the Science of Asking Questions." *Annual Review of Sociology* 46:37-60.

### 2. Other exercises

- We will be doing in-class exercises on most days.
- Exercises and discussion in class complement the lecture.
- Exercises are designed to help you integrate the course material.

## Grades

- This course is not offered for a grade.
